

It's just like working with a human tutor!

Master the Accounting Cycle

Artificial Intelligence tutoring software provides effective, step-by-step feedback and homework help for students in principles, financial and managerial accounting.

Topics include: Transaction Analysis, Adjusting Entries and Financial Statement Preparation

Proven To Increase Test Scores

Improve test scores by at least a full letter grade and maximize the effectiveness of your study time.

Unlimited Practice with Problems Just Like the Ones in Your Textbook

Includes corporate accounting and sole proprietorship problems mapped to your McGraw-Hill textbook and end-of-chapter problems.

It's Just Like Working with a Human Tutor

Similar to working with an excellent tutor or instructor one-on-one, powerful artificial intelligence software interacts with you in a conversational manner so you spend time learning accounting, not the software.

Step-by-Step Feedback on Your Own Work

Enter your **own** work and the Tutors interpret your responses and provide coaching and detailed feedback so you get the right answer for the right reason.

Immediate Answers to Your Questions

Includes an evolving menu of questions that change based on your unique responses. Your knowledge of the subject greatly improves by learning to ask better questions.

More Productive Study Time

Ideal when you're studying and the instructor is not available to help or answer questions.

Convenient Internet Access Day or Night

Login from any PC or MAC. No CDs or downloads required.

Proven to increase test performance by at least a full letter grade

Only \$15.00 per Semester Unlimited Use!
